Connect ● **LIVE** with your customers
& boost your sales!

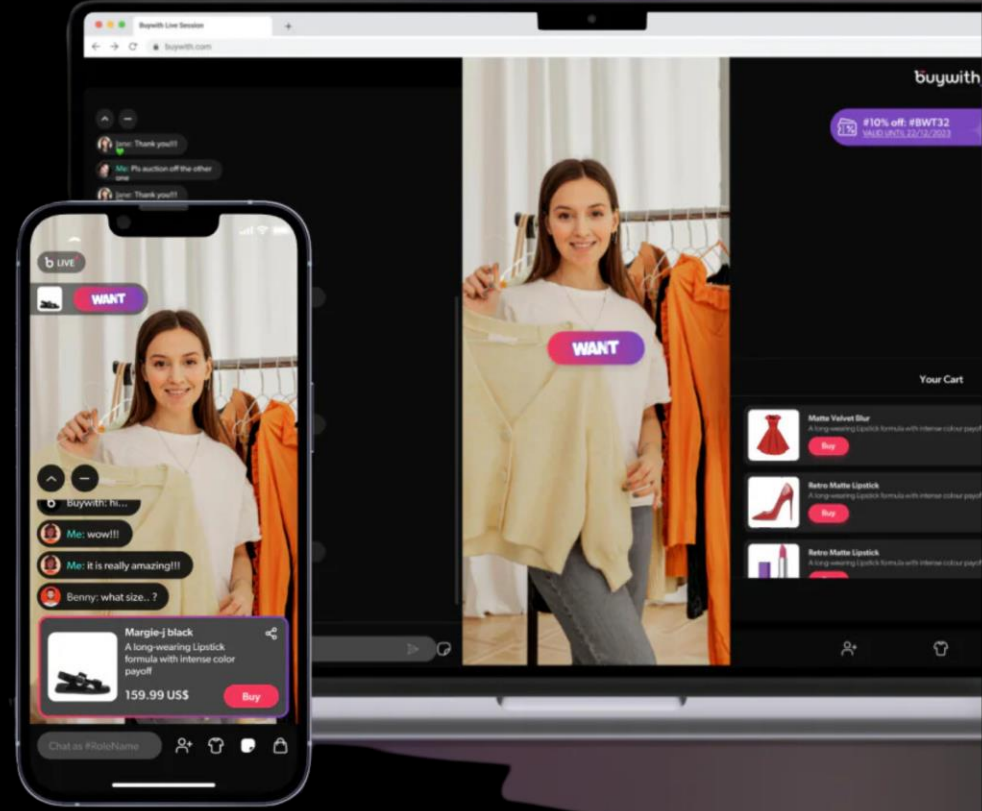

Exclusively represented by  **generation Y**
international e-business hub

What is Live Shopping?

Live shopping is an online shopping experience where products are showcased in real-time via a live video stream.

A host, often a brand representative or influencer, demonstrates products, answers questions from viewers, and provides direct links for instant purchasing.

It combines entertainment with the convenience of online shopping, allowing for interactive engagement and immediate buying decisions.

Engage your customers with buywith

Buywith is a Live Shopping tool that integrates your e-shop and enables brands and retailers to connect with their audience through live shopping events hosted on your e-shop and AI-generated product snippets, with no dependencies on third party platforms, such as social live sessions or Amazon live.
